GENERAL CONDITIONS

1. All work shall be installed and inspected pursuant to the requirements set forth by, VUSBC, ASAD, CPSM, Manufacturer Installation Instructions and Mason Design Manual.
2. Contractor shall maintain all egress pathways clear of obstructions, and provide protective barriers preventing occupant access into the construction work zone.
3. Contractor shall coordinate through Mason for any or all shutdowns of any utilities or building Life Safety systems.
4. Contractor shall coordinate with Mason EH&S concerning "Hot Work" requirements and permits and fire watch procedures.

BUILDING CODE SERVICE ACTION

Project Documents (plans, specifications & addenda) described above are approved for construction except:

1. The Permit Requestor shall contact BCS at permits@gmu.edu or in person a minimum of five (5) days before the required open wall, above ceiling and substantial completion inspections in accordance with CPSM. The Project Manager will provide e-mail verification that the BCS inspection report comments have been resolved along with project permit closeout application.
2. Demolition and/or any land disturbing activities within the construction limits shall conform to all federal, state, and local regulations for notices, safety, erosion and sediment control, environmental quality, and disposal and materials.

NO OTHER CHANGES to the above Work required pursuant to the VUSBC or CPSM shall be made without the written approval of the Building Code Services.

The contractor may, without additional building permit, locate necessary office, storage and sanitary facilities on the jobsite during the construction period at locations suitable to the Owner provided such facilities are properly and safely installed, anchored, and maintained per applicable codes and standards.
